Thin Solid Films 294 (1997) 359–365

thin solid films

Subject Index of Volume 294

Alloys
cold-walled UHV/CVD batch reactor for the growth of $Si_{1-x}Ge_x$ layers, 72
ternary SiGeC alloys: growth and properties of a new semiconducting material, 93
pseudomorphic $Si_{1-y}C_y$ and $Si_{1-x-y}Ge_xC_y$ alloy layers on Si, 98
near band edge photoluminescence from pseudomorphic tensially strained $Si_{0.985}C_{0.015}$ alloy, 122
infrared spectroscopy of strained $Si_{1-y}C_y$ alloys ($0 \le y \le 0.015$) grown on silicon, 133
titanium metallization of Si/Ge alloys and superlattices, 217
Auger electron spectroscopy
new Ge substrate cleaning method for $Si_{1-x-y}Ge_xC_y$ MOMBE growth, 153
Auger ionization
non-one-dimensional effects in tunnel MOS devices, 281

Band offset
thermal emission of holes from confined levels in strained SiGe channel p-MOSFETS, 211
68.55.Bd
relaxed epitaxial $Si_{1-x}Ge_x$ grown by MBE, 43
Boron
quantification of germanium and boron in heterostructures $Si/Si_{1-x}Ge_x/Si$ by SIMS, 54

Carbon
pseudomorphic $Si_{1-y}C_y$ and $Si_{1-x-y}Ge_xC_y$ alloy layers on Si, 98
carbon and germanium distributions in $Si_{1-x-y}Ge_xC_y$ layers epitaxially grown on Si(001) by RTCVD, 129
infrared spectroscopy of strained $Si_{1-y}C_y$ alloys ($0 \le y \le 0.015$) grown on silicon, 133
Fermi-level pinning in Schottky diodes on IV–IV semiconductors: effect of Ge and C incorporation, 141
Carrier confinement
thermal emission of holes from confined levels in strained SiGe channel p-MOSFETS, 211
Channel length
vertical Si p-MOS transistor selectively grown by low pressure chemical vapour deposition, 267
Charge control model
characterisation of an n-type Si/SiGe modulation doped field-effect transistor, 263
Chemical vapour deposition
real-time control of layer thickness in LPCVD $Si/Si_{.88}Ge_{.12}$ HBT structures, 18
UHV-CVD heteroepitaxial growth of $Si_{1-x}Ge_x$ alloys on Si(100) using silane and germane, 59
cold-walled UHV/CVD batch reactor for the growth of $Si_{1-x}Ge_x$ layers, 72
growth of single-crystal Si, Ge and SiGe layers using plasma-assisted CVD, 76
RTCVD growth and characterization of SiGeC multi-quantum wells, 125
carbon and germanium distributions in $Si_{1-x-y}Ge_xC_y$ layers epitaxially grown on Si(001) by RTCVD, 129
electrical properties of silicon nitride films grown on a SiGe layer by distributed electron cyclotron resonance plasma-enhanced chemical vapor deposition, 214
strained SiGe/Si quantum well dots and wires selectively grown by LPCVD and their optical properties, 284
Chemisorption
incorporation of substitutional carbon in Si and SiGe by laser processing in methane and propylene, 137
Collective excitations
collective excitations of electron disks in laterally patterned Si/SiGe modulation-doped heterojunctions, 315
Contacts
$si_{1-x}Ge_x/Si$ valence band offset determination using current–voltage characteristics, 198
Correlation
anomalous photoluminescence of pure-Ge/Si type-II coupled quantum wells (II-CQWs), 336

Deep-levels
recombination mechanisms via deep levels in RTCVD $Si/Si_{0.85}Ge_{0.15}/Si$ double heterostructures, 194
Deep level transient spectroscopy
characterization of Si/SiGe heterojunction bipolar transistors by deep level transient spectroscopy, 271
Diamond-like carbon
fabrication of a nanosize Si-tip coated with a thin diamond-like carbon film, 157
Dislocation patterning
dislocation patterning — a new tool for spatial manipulation of Ge islands, 311
Dislocations
time-resolved dislocation-related luminescence in strain-relaxed SiGe/Si, 33
room-temperature electroluminescence from dislocations in silicon, 201
Dynamic behaviour
dynamical behavior in a shallow quantum confinement system, 318

Electrical properties
optical and electrical properties of $Si_{1-x-y}Ge_xC_y$ thin films and devices, 112
Electrical properties and measurements
electrophysical studies of 2D-hole spectral characteristics and peculiarities of scattering mechanisms in Ge layers of $Ge–Ge_{1-x}Si_x$ heterostructures, 208
electrical properties of silicon nitride films grown on a SiGe layer by distributed electron cyclotron resonance plasma-enhanced chemical vapor deposition, 214

Elsevier Science S.A.

d.c. electric-field-induced second-harmonic generation in Si–SiO_2 multiple quantum wells, 235
Electroluminescence
room-temperature electroluminescence from dislocations in silicon, 201
Electron disks
collective excitations of electron disks in laterally patterned Si/SiGe modulation-doped heterojunctions, 315
Electronic structure
novel microscopic properties and the electronic structure of SiGe heterostructures and related systems, 166
Electron localization
anomalous photoluminescence of pure-Ge/Si type-II coupled quantum wells (II-CQWs), 336
Emitter crowding
non-one-dimensional effects in tunnel MOS devices, 281
Epitaxial CMOS
proposal for a new process flow for the fabrication of silicon-based complementary MOD-MOSFETs without ion implantation, 254
Epitaxial devices
proposal for a new process flow for the fabrication of silicon-based complementary MOD-MOSFETs without ion implantation, 254
Epitaxy
single-wafer Si and SiGe processes for advanced ULSI technologies, 11
UHV-CVD heteroepitaxial growth of $Si_{1-x}Ge_x$ alloys on Si(100) using silane and germane, 59
surface morphology and reconstructions of ultra thin Si films grown by solid-phase epitaxy, 88
carbon and germanium distributions in $Si_{1-x-y}Ge_xC_y$ layers epitaxially grown on Si(001) by RTCVD, 129
strained SiGe/Si quantum well dots and wires selectively grown by LPCVD and their optical properties, 284
vertical MSM photodiodes in silicon based on epitaxial Si/$CoSi_2$/Si, 351
Erbium
erbium–silicon light-emitting diodes grown by molecular beam epitaxy: optical properties, 220
Excimer laser annealing
strain compensation in $Si_{1-x-y}Ge_xC_y$ layers prepared by ion implantation and excimer laser annealing, 145

Fermi level
Fermi-level pinning in Schottky diodes on IV–IV semiconductors: effect of Ge and C incorporation, 141
Field effect
fully pseudomorphic Si/SiGe/Si heterostructures for p-channel field effect devices, 160
local electric field effects in a SiGe quantum well investigated by photoluminescence, 190
Field emission
fabrication of a nanosize Si-tip coated with a thin diamond-like carbon film, 157

Germanium
real-time control of layer thickness in LPCVD Si/$Si_{.88}Ge_{.12}$ HBT structures, 18
growth mechanisms of SiGe on (111) and (100) Si substrates, 22
defect-free strain relaxation in locally MBE-grown SiGe heterostructures, 27
time-resolved dislocation-related luminescence in strain-relaxed SiGe/Si, 33
quantification of germanium and boron in heterostructures Si/$Si_{1-x}Ge_x$/Si by SIMS, 54
UHV-CVD heteroepitaxial growth of $Si_{1-x}Ge_x$ alloys on Si(100) using silane and germane, 59
structural disorder in SiGe films grown epitaxially on Si by ion beam sputter deposition, 64
cold-walled UHV/CVD batch reactor for the growth of $Si_{1-x}Ge_x$ layers, 72
growth of single-crystal Si, Ge and SiGe layers using plasma-assisted CVD, 76
growth of epitaxial SiGe nanostructures at low temperature on Si(100) using hot-wire assisted gas source molecular beam epitaxy, 84
pseudomorphic $Si_{1-y}C_y$ and $Si_{1-x-y}Ge_xC_y$ alloy layers on Si, 98
optical and electrical properties of $Si_{1-x-y}Ge_xC_y$ thin films and devices, 112
carbon and germanium distributions in $Si_{1-x-y}Ge_xC_y$ layers epitaxially grown on Si(001) by RTCVD, 129
Fermi-level pinning in Schottky diodes on IV–IV semiconductors: effect of Ge and C incorporation, 141
new Ge substrate cleaning method for $Si_{1-x-y}Ge_xC_y$ MOMBE growth, 153
fully pseudomorphic Si/SiGe/Si heterostructures for p-channel field effect devices, 160
novel microscopic properties and the electronic structure of SiGe heterostructures and related systems, 166
low-field magnetoresistance in Si/SiGe quantum wells, 179
thermoelectric power of the Si/$Si_{0.8}$ $Ge_{0.2}$ two-dimensional hole gas, 182
optical spectra and recombination in Si–Ge heterostructures, 186
local electric field effects in a SiGe quantum well investigated by photoluminescence, 190
$Si_{1-x}Ge_x$/Si valence band offset determination using current–voltage characteristics, 198
electrophysical studies of 2D-hole spectral characteristics and peculiarities of scattering mechanisms in Ge layers of Ge–$Ge_{1-x}Si_x$ heterostructures, 208
electrical properties of silicon nitride films grown on a SiGe layer by distributed electron cyclotron resonance plasma-enhanced chemical vapor deposition, 214
SiGe/$SiGeO_2$ interface defects, 242
recent advances with SiGe heterojunction bipolar transistors, 246
integration of SiGe heterojunction bipolar transistors in a 200 mm industrial BiCMOS technology, 250
characterization of Si/SiGe heterojunction bipolar transistors by deep level transient spectroscopy, 271
use of narrow collector layers in Si and $Si_{1-x}Ge_x$ bipolar transistors, 274
growth of self-assembled homogeneous SiGe-dots on Si(100), 291
controlling the strain and light emission from Si–$Si_{1-x}Ge_x$ quantum dots, 304
self-assembled growth of Sn on Ge (001), 308
dislocation patterning — a new tool for spatial manipulation of Ge islands, 311
collective excitations of electron disks in laterally patterned Si/SiGe modulation-doped heterojunctions, 315
dynamical behavior in a shallow quantum confinement system, 318
IR studies of p-type Si/SiGe quantum wells: intersubband absorption, IR detectors, and second-harmonic generation, 330
IR absorption and quantum efficiency of highly p-doped SiGe layers, 340
GeSi infrared detectors, 343
lateral photodetector devices on Si/SiGe heterostructures, 347
Germanium dots
X-ray diffraction and reflection from self-assembled Ge dots, 296
Graded buffer layers
line, point and surface defect morphology of graded, relaxed GeSi alloys on Si substrates, 3
Grazing X-ray reflectance
combined characterization of group IV heterostructures and materials by spectroscopic ellipsometry and grazing X-ray reflectance, 37

Growth mechanism
growth mechanisms of SiGe on (111) and (100) Si substrates, 22
growth of epitaxial SiGe nanostructures at low temperature on Si(100) using hot-wire assisted gas source molecular beam epitaxy, 84
ternary SiGeC alloys: growth and properties of a new semiconducting material, 93
RTCVD growth and characterization of SiGeC multi-quantum wells, 125
Growth morphology
improved growth morphology of Si–Ge–C heterostructures through the use of Sb surfactant-assisted molecular beam epitaxy, 105
Growth parameters
growth of self-assembled homogeneous SiGe-dots on Si(100), 291
Growth temperature
recombination mechanisms via deep levels in RTCVD $Si/Si_{0.85}Ge_{0.15}/Si$ double heterostructures, 194

Heterojunction bipolar transistor
use of narrow collector layers in Si and $Si_{1-x}Ge_x$ bipolar transistors, 274
Heterojunction internal photoemission diode
infrared-sensitive SiGe–Si heterojunction internal photoemission detectors produced by rapid thermal chemical vapour deposition, 354
Heterojunctions
recent advances with SiGe heterojunction bipolar transistors, 246
characterization of Si/SiGe heterojunction bipolar transistors by deep level transient spectroscopy, 271
Heterostructures
defect-free strain relaxation in locally MBE-grown SiGe heterostructures, 27
quantification of germanium and boron in heterostructures $Si/Si_{1-x}Ge_x/Si$ by SIMS, 54
improved growth morphology of Si–Ge–C heterostructures through the use of Sb surfactant-assisted molecular beam epitaxy, 105
fully pseudomorphic Si/SiGe/Si heterostructures for p-channel field effect devices, 160
novel microscopic properties and the electronic structure of SiGe heterostructures and related systems, 166
optical spectra and recombination in Si–Ge heterostructures, 186
electrophysical studies of 2D-hole spectral characteristics and peculiarities of scattering mechanisms in Ge layers of $Ge–Ge_{1-x}Si_x$ heterostructures, 208
lateral photodetector devices on Si/SiGe heterostructures, 347
High-resolution transmission electronmicroscopy
HRTEM study of $Si_{1-x}Ge_x$ multilayer, 80
Hole gas
thermoelectric power of the $Si/Si_{0.8}Ge_{0.2}$ two-dimensional hole gas, 182
Homoepitaxy
homoepitaxy of silicon at low temperature on clean and Ga-covered substrates, 69

Infrared absorption spectroscopy
incorporation of substitutional carbon in Si and SiGe by laser processing in methane and propylene, 137
Infrared photodiodes
infrared-sensitive SiGe–Si heterojunction internal photoemission detectors produced by rapid thermal chemical vapour deposition, 354
Infrared spectroscopy
infrared spectroscopy of strained $Si_{1-y}C_y$ alloys ($0 \le y \le 0.015$) grown on silicon, 133
GeSi infrared detectors, 343
Interdiffusion
spectroscopy of intersubband transitions in $Si–Si_{1-x}Ge_x$ quantum wells, 173
Interfaces
strain relaxation and thermal stability of the 3C-SiC(001)/Si(001) interface: A molecular dynamics study, 47
$SiGe/SiGeO_2$ interface defects, 242
Intersubband transitions
spectroscopy of intersubband transitions in $Si–Si_{1-x}Ge_x$ quantum wells, 173
Interwell coupling
anomalous photoluminescence of pure-Ge/Si type-II coupled quantum wells (II-CQWs), 336
Ion beam crystallization
erbium doping of Si via ion-beam-induced epitaxial crystallization: another route to room-temperature photoluminescence, 223
Ion implantation
strain compensation in $Si_{1-x-y}Ge_xC_y$ layers prepared by ion implantation and excimer laser annealing, 145
IR absorption
IR absorption and quantum efficiency of highly p-doped SiGe layers, 340
IR study
IR studies of p-type Si/SiGe quantum wells: intersubband absorption, IR detectors, and second-harmonic generation, 330
Islocation pile-ups
line, point and surface defect morphology of graded, relaxed GeSi alloys on Si substrates, 3
IV–IV alloy
incorporation of substitutional carbon in Si and SiGe by laser processing in methane and propylene, 137

Laser doping
incorporation of substitutional carbon in Si and SiGe by laser processing in methane and propylene, 137
Laser melting
incorporation of substitutional carbon in Si and SiGe by laser processing in methane and propylene, 137
Lasers
prospects for novel Si-based optoelectronic devices: unipolar and p–i–p–i lasers, 325
Layer thickness
real-time control of layer thickness in LPCVD $Si/Si_{.88}Ge_{.12}$ HBT structures, 18
Light emission
controlling the strain and light emission from $Si–Si_{1-x}Ge_x$ quantum dots, 304
Light emissivity
local-symmetry effect on light emissivity from SiGe quantum wells, 204
68.55.Lm
relaxed epitaxial $Si_{1-x}Ge_x$ grown by MBE, 43
Local symmetry
local-symmetry effect on light emissivity from SiGe quantum wells, 204
Low pressure chemical vapor deposition
atomic layer doping of SiGe by low pressure (rapid thermal) chemical vapor deposition, 15
vertical Si p-MOS transistor selectively grown by low pressure chemical vapour deposition, 267
Low-temperature chemical vapour deposition
single-wafer Si and SiGe processes for advanced ULSI technologies, 11
Luminescence
time-resolved dislocation-related luminescence in strain-relaxed SiGe/Si, 33
effects of substrate bias and rapid thermal processing on the luminescence of Si/SiGe multiple quantum wells grown by MBE, 50

Magnetoresistance
low-field magnetoresistance in Si/SiGe quantum wells, 179

Metallization
titanium metallization of Si/Ge alloys and superlattices, 217
Metals
vertical MSM photodiodes in silicon based on epitaxial Si/$CoSi_2$/Si, 351
Methane
incorporation of substitutional carbon in Si and SiGe by laser processing in methane and propylene, 137
Microscopic properties
novel microscopic properties and the electronic structure of SiGe heterostructures and related systems, 166
Modulation doped field-effect transistor
characterisation of an n-type Si/SiGe modulation doped field-effect transistor, 263
Modulation-doped heterojunctions
collective excitations of electron disks in laterally patterned Si/SiGe modulation-doped heterojunctions, 315
Molecular beam epitaxy
defect-free strain relaxation in locally MBE-grown SiGe heterostructures, 27
growth of epitaxial SiGe nanostructures at low temperature on Si(100) using hot-wire assisted gas source molecular beam epitaxy, 84
improved growth morphology of Si–Ge–C heterostructures through the use of Sb surfactant-assisted molecular beam epitaxy, 105
near band edge photoluminescence from pseudomorphic tensially strained $Si_{0.985}C_{0.015}$ alloy, 122
erbium–silicon light-emitting diodes grown by molecular beam epitaxy: optical properties, 220
recent advances with SiGe heterojunction bipolar transistors, 246
growth of self-assembled homogeneous SiGe-dots on Si(100), 291
Molecular dynamics
strain relaxation and thermal stability of the 3C-SiC(001)/Si(001) interface: A molecular dynamics study, 47
Monte Carlo analysis
study of uniform and graded SiGe channel heterojunction p-MOSFETs using Monte Carlo simulation, 259
MOSFET
study of uniform and graded SiGe channel heterojunction p-MOSFETs using Monte Carlo simulation, 259
Multilayers
HRTEM study of $Si_{1-x}Ge_x$ multilayer, 80
RTCVD growth and characterization of SiGeC multi-quantum wells, 125
Multiple quantum wells
effects of substrate bias and rapid thermal processing on the luminescence of Si/SiGe multiple quantum wells grown by MBE, 50

Nanoparticles
highly oriented Si nanoparticles in SiO_2 created by Si molecular beam epitaxy with oxygen implantation, 227
Nano-size Si tip
fabrication of a nanosize Si-tip coated with a thin diamond-like carbon film, 157
Nanostructures
growth of epitaxial SiGe nanostructures at low temperature on Si(100) using hot-wire assisted gas source molecular beam epitaxy, 84
Narrow collector layers
use of narrow collector layers in Si and $Si_{1-x}Ge_x$ bipolar transistors, 274
NiTi
new type of Schottky barriers using NiTi shape memory alloy films, 278

Optical properties
optical and electrical properties of $Si_{1-x-y}Ge_xC_y$ thin films and devices, 112
erbium–silicon light-emitting diodes grown by molecular beam epitaxy: optical properties, 220
strained SiGe/Si quantum well dots and wires selectively grown by LPCVD and their optical properties, 284
Optical saturation
spectroscopy of intersubband transitions in Si–$Si_{1-x}Ge_x$ quantum wells, 173
Optical spectroscopy
optical spectra and recombination in Si–Ge heterostructures, 186
Optoelectronics
prospects for novel Si-based optoelectronic devices: unipolar and p–i–p–i lasers, 325
Oxides
SiGe/$SiGeO_2$ interface defects, 242
Oxygen
erbium–silicon light-emitting diodes grown by molecular beam epitaxy: optical properties, 220

Phosphorus doping
atomic layer doping of SiGe by low pressure (rapid thermal) chemical vapor deposition, 15
Photodiodes
vertical MSM photodiodes in silicon based on epitaxial Si/$CoSi_2$/Si, 351
Photoluminescence
near band edge photoluminescence from pseudomorphic tensially strained $Si_{0.985}C_{0.015}$ alloy, 122
local electric field effects in a SiGe quantum well investigated by photoluminescence, 190
recombination mechanisms via deep levels in RTCVD Si/$Si_{0.85}Ge_{0.15}$/Si double heterostructures, 194
erbium doping of Si via ion-beam-induced epitaxial crystallization: another route to room-temperature photoluminescence, 223
effect of annealing and H_2 passivation on the photoluminescence of Si nanocrystals in SiO_2, 238
anomalous photoluminescence of pure-Ge/Si type-II coupled quantum wells (II-CQWs), 336
Plasma processing and deposition
growth of single-crystal Si, Ge and SiGe layers using plasma-assisted CVD, 76
p-MOSFET
thermal emission of holes from confined levels in strained SiGe channel p-MOSFETS, 211
pn junctions
vertical Si p-MOS transistor selectively grown by low pressure chemical vapour deposition, 267
Point defects
line, point and surface defect morphology of graded, relaxed GeSi alloys on Si substrates, 3
Propylene
incorporation of substitutional carbon in Si and SiGe by laser processing in methane and propylene, 137
Pulsed laser-induced epitaxy
incorporation of substitutional carbon in Si and SiGe by laser processing in methane and propylene, 137
Pure-Ge/Si
anomalous photoluminescence of pure-Ge/Si type-II coupled quantum wells (II-CQWs), 336

Quantum confinement
dynamical behavior in a shallow quantum confinement system, 318
Quantum dot array
lattice distortion in dry-etched Si/SiGe quantum dot array studied by 2D reciprocal space mapping using synchrotron X-ray diffraction, 300

Quantum dots
controlling the strain and light emission from Si–$Si_{1-x}Ge_x$ quantum dots, 304
Quantum wells
spectroscopy of intersubband transitions in Si–$Si_{1-x}Ge_x$ quantum wells, 173
low-field magnetoresistance in Si/SiGe quantum wells, 179
local electric field effects in a SiGe quantum well investigated by photoluminescence, 190
local-symmetry effect on light emissivity from SiGe quantum wells, 204
d.c. electric-field-induced second-harmonic generation in Si–SiO_2 multiple quantum wells, 235
strained SiGe/Si quantum well dots and wires selectively grown by LPCVD and their optical properties, 284
IR studies of p-type Si/SiGe quantum wells: intersubband absorption, IR detectors, and second-harmonic generation, 330
GeSi infrared detectors, 343

Raman scattering
local strains in $Si_{1-x-y}Ge_xC_y$ alloys as deduced from vibrational frequencies, 118
Raman spectroscopy
carbon and germanium distributions in $Si_{1-x-y}Ge_xC_y$ layers epitaxially grown on Si(001) by RTCVD, 129
Rapid thermal chemical vapour deposition
comparison of $Si_{1-y}C_y$ films produced by solid-phase epitaxy and rapid thermal chemical vapour deposition, 149
infrared-sensitive SiGe–Si heterojunction internal photoemission detectors produced by rapid thermal chemical vapour deposition, 354
Rapid thermal processing
effects of substrate bias and rapid thermal processing on the luminescence of Si/SiGe multiple quantum wells grown by MBE, 50
Rare earth metals
erbium doping of Si via ion-beam-induced epitaxial crystallization: another route to room-temperature photoluminescence, 223
Recessed-Gate
proposal for a new process flow for the fabrication of silicon-based complementary MOD-MOSFETs without ion implantation, 254
Reciprocal space mapping
lattice distortion in dry-etched Si/SiGe quantum dot array studied by 2D reciprocal space mapping using synchrotron X-ray diffraction, 300
Relaxation
HRTEM study of $Si_{1-x}Ge_x$ multilayer, 80
Relaxed GeSi/Si
line, point and surface defect morphology of graded, relaxed GeSi alloys on Si substrates, 3
Rutherford backscattering spectroscopy
new Ge substrate cleaning method for $Si_{1-x-y}Ge_xC_y$ MOMBE growth, 153
Rutherford channeling
erbium doping of Si via ion-beam-induced epitaxial crystallization: another route to room-temperature photoluminescence, 223

Sample preparation
HRTEM study of $Si_{1-x}Ge_x$ multilayer, 80
Scanning tunnelling microscopy
surface morphology and reconstructions of ultra thin Si films grown by solid-phase epitaxy, 88
Schottky diodes
Fermi-level pinning in Schottky diodes on IV–IV semiconductors: effect of Ge and C incorporation, 141
new type of Schottky barriers using NiTi shape memory alloy films, 278
Secondary ion mass spectrometry
quantification of germanium and boron in heterostructures Si/$Si_{1-x}Ge_x$/Si by SIMS, 54
Second harmonic generation
d.c. electric-field-induced second-harmonic generation in Si–SiO_2 multiple quantum wells, 235
Second-harmonic generation spectroscopy
d.c. electric field induced second-harmonic generation spectroscopy of the Si(001)–SiO_2 interface: separation of the bulk and surface nonlinear contributions, 231
Selectivity
single-wafer Si and SiGe processes for advanced ULSI technologies, 11
Self-assembled growth
self-assembled growth of Sn on Ge (001), 308
Self-organized nanostructures
X-ray diffraction and reflection from self-assembled Ge dots, 296
Semiconductors
ternary SiGeC alloys: growth and properties of a new semiconducting material, 93
Fermi-level pinning in Schottky diodes on IV–IV semiconductors: effect of Ge and C incorporation, 141
vertical MSM photodiodes in silicon based on epitaxial Si/$CoSi_2$/Si, 351
Shape memory alloy films
new type of Schottky barriers using NiTi shape memory alloy films, 278
Short-range order
local strains in $Si_{1-x-y}Ge_xC_y$ alloys as deduced from vibrational frequencies, 118
Si/SiGe superlattice
lattice distortion in dry-etched Si/SiGe quantum dot array studied by 2D reciprocal space mapping using synchrotron X-ray diffraction, 300
$Si_{1-x}Ge_x$
infrared-sensitive SiGe–Si heterojunction internal photoemission detectors produced by rapid thermal chemical vapour deposition, 354
$Si_{1-x-y}Ge_xC_y$
comparison of $Si_{1-y}C_y$ films produced by solid-phase epitaxy and rapid thermal chemical vapour deposition, 149
$Si_{1-y}C_y$
comparison of $Si_{1-y}C_y$ films produced by solid-phase epitaxy and rapid thermal chemical vapour deposition, 149
SiC
incorporation of substitutional carbon in Si and SiGe by laser processing in methane and propylene, 137
SiGe
atomic layer doping of SiGe by low pressure (rapid thermal) chemical vapor deposition, 15
combined characterization of group IV heterostructures and materials by spectroscopic ellipsometry and grazing X-ray reflectance, 37
HRTEM study of $Si_{1-x}Ge_x$ multilayer, 80
recombination mechanisms via deep levels in RTCVD Si/$Si_{0.85}Ge_{0.15}$/Si double heterostructures, 194
thermal emission of holes from confined levels in strained SiGe channel p-MOSFETS, 211
study of uniform and graded SiGe channel heterojunction p-MOSFETs using Monte Carlo simulation, 259
characterisation of an n-type Si/SiGe modulation doped field-effect transistor, 263
SiGeC
ternary SiGeC alloys: growth and properties of a new semiconducting material, 93
incorporation of substitutional carbon in Si and SiGe by laser processing in methane and propylene, 137

SiGeC alloys
local strains in $Si_{1-x-y}Ge_xC_y$ alloys as deduced from vibrational frequencies, 118
SiGeC layers
strain compensation in $Si_{1-x-y}Ge_xC_y$ layers prepared by ion implantation and excimer laser annealing, 145
Silane
UHV-CVD heteroepitaxial growth of $Si_{1-x}Ge_x$ alloys on Si(100) using silane and germane, 59
Silicon
real-time control of layer thickness in LPCVD Si/$Si_{.88}Ge_{.12}$ HBT structures, 18
growth mechanisms of SiGe on (111) and (100) Si substrates, 22
defect-free strain relaxation in locally MBE-grown SiGe heterostructures, 27
time-resolved dislocation-related luminescence in strain-relaxed SiGe/Si, 33
structural disorder in SiGe films grown epitaxially on Si by ion beam sputter deposition, 64
homoepitaxy of silicon at low temperature on clean and Ga-covered substrates, 69
cold-walled UHV/CVD batch reactor for the growth of $Si_{1-x}Ge_x$ layers, 72
growth of single-crystal Si, Ge and SiGe layers using plasma-assisted CVD, 76
growth of epitaxial SiGe nanostructures at low temperature on Si(100) using hot-wire assisted gas source molecular beam epitaxy, 84
surface morphology and reconstructions of ultra thin Si films grown by solid-phase epitaxy, 88
pseudomorphic $Si_{1-y}C_y$ and $Si_{1-x-y}Ge_xC_y$ alloy layers on Si, 98
optical and electrical properties of $Si_{1-x-y}Ge_xC_y$ thin films and devices, 112
carbon and germanium distributions in $Si_{1-x-y}Ge_xC_y$ layers epitaxially grown on Si(001) by RTCVD, 129
infrared spectroscopy of strained $Si_{1-y}C_y$ alloys ($0 \le y \le 0.015$) grown on silicon, 133
fully pseudomorphic Si/SiGe/Si heterostructures for p-channel field effect devices, 160
novel microscopic properties and the electronic structure of SiGe heterostructures and related systems, 166
low-field magnetoresistance in Si/SiGe quantum wells, 179
thermoelectric power of the Si/$Si_{0.8}$ $Ge_{0.2}$ two-dimensional hole gas, 182
optical spectra and recombination in Si–Ge heterostructures, 186
local electric field effects in a SiGe quantum well investigated by photoluminescence, 190
$si_{1-x}Ge_x$/Si valence band offset determination using current–voltage characteristics, 198
highly oriented Si nanoparticles in SiO_2 created by Si molecular beam epitaxy with oxygen implantation, 227
d.c. electric field induced second-harmonic generation spectroscopy of the Si(001)–SiO_2 interface: separation of the bulk and surface nonlinear contributions, 231
d.c. electric-field-induced second-harmonic generation in Si–SiO_2 multiple quantum wells, 235
effect of annealing and H_2 passivation on the photoluminescence of Si nanocrystals in SiO_2, 238
SiGe/$SiGeO_2$ interface defects, 242
recent advances with SiGe heterojunction bipolar transistors, 246
integration of SiGe heterojunction bipolar transistors in a 200 mm industrial BiCMOS technology, 250
characterization of Si/SiGe heterojunction bipolar transistors by deep level transient spectroscopy, 271
use of narrow collector layers in Si and $Si_{1-x}Ge_x$ bipolar transistors, 274
growth of self-assembled homogeneous SiGe-dots on Si(100), 291
controlling the strain and light emission from Si–$Si_{1-x}Ge_x$ quantum dots, 304
collective excitations of electron disks in laterally patterned Si/SiGe modulation-doped heterojunctions, 315
dynamical behavior in a shallow quantum confinement system, 318
prospects for novel Si-based optoelectronic devices: unipolar and p–i–p–i lasers, 325
IR studies of p-type Si/SiGe quantum wells: intersubband absorption, IR detectors, and second-harmonic generation, 330
IR absorption and quantum efficiency of highly p-doped SiGe layers, 340
GeSi infrared detectors, 343
lateral photodetector devices on Si/SiGe heterostructures, 347
vertical MSM photodiodes in silicon based on epitaxial Si/$CoSi_2$/Si, 351
Silicon carbide
combined characterization of group IV heterostructures and materials by spectroscopic ellipsometry and grazing X-ray reflectance, 37
Silicon dioxide
d.c. electric-field-induced second-harmonic generation in Si–SiO_2 multiple quantum wells, 235
Silicon–germanium
single-wafer Si and SiGe processes for advanced ULSI technologies, 11
local-symmetry effect on light emissivity from SiGe quantum wells, 204
Silicon nitride
electrical properties of silicon nitride films grown on a SiGe layer by distributed electron cyclotron resonance plasma-enhanced chemical vapor deposition, 214
Si MOD-MOSFETs
proposal for a new process flow for the fabrication of silicon-based complementary MOD-MOSFETs without ion implantation, 254
Si p-MOS transistor
vertical Si p-MOS transistor selectively grown by low pressure chemical vapour deposition, 267
Solid-phase epitaxy
comparison of $Si_{1-y}C_y$ films produced by solid-phase epitaxy and rapid thermal chemical vapour deposition, 149
Spatial manipulation
dislocation patterning — a new tool for spatial manipulation of Ge islands, 311
Spectroscopic ellipsometry
combined characterization of group IV heterostructures and materials by spectroscopic ellipsometry and grazing X-ray reflectance, 37
Strain
HRTEM study of $Si_{1-x}Ge_x$ multilayer, 80
lattice distortion in dry-etched Si/SiGe quantum dot array studied by 2D reciprocal space mapping using synchrotron X-ray diffraction, 300
controlling the strain and light emission from Si–$Si_{1-x}Ge_x$ quantum dots, 304
Strain compensation
strain compensation in $Si_{1-x-y}Ge_xC_y$ layers prepared by ion implantation and excimer laser annealing, 145
Strain relaxation
growth mechanisms of SiGe on (111) and (100) Si substrates, 22
defect-free strain relaxation in locally MBE-grown SiGe heterostructures, 27
strain relaxation and thermal stability of the 3C-SiC(001)/Si(001) interface: A molecular dynamics study, 47
Structural disorder
structural disorder in SiGe films grown epitaxially on Si by ion beam sputter deposition, 64
Substrate bias
effects of substrate bias and rapid thermal processing on the luminescence of Si/SiGe multiple quantum wells grown by MBE, 50

Superlattices
RTCVD growth and characterization of SiGeC multi-quantum wells, 125
titanium metallization of Si/Ge alloys and superlattices, 217
Surface cleaning
new Ge substrate cleaning method for $Si_{1-x-y}Ge_xC_y$ MOMBE growth, 153
Surface morphology
surface morphology and reconstructions of ultra thin Si films grown by solid-phase epitaxy, 88
Surface passivation
cold-walled UHV/CVD batch reactor for the growth of $Si_{1-x}Ge_x$ layers, 72
Surfactants
improved growth morphology of Si–Ge–C heterostructures through the use of Sb surfactant-assisted molecular beam epitaxy, 105

Thermal stability
strain relaxation and thermal stability of the 3C-SiC(001)/Si(001) interface: A molecular dynamics study, 47
Thermoelectrics
thermoelectric power of the $Si/Si_{0.8}Ge_{0.2}$ two-dimensional hole gas, 182
Tin
self-assembled growth of Sn on Ge (001), 308
Titanium
titanium metallization of Si/Ge alloys and superlattices, 217
Transconductance
characterisation of an n-type Si/SiGe modulation doped field-effect transistor, 263
Transmission electron microscopy
new Ge substrate cleaning method for $Si_{1-x-y}Ge_xC_y$ MOMBE growth, 153
Tunnel MOS emitter transistor
non-one-dimensional effects in tunnel MOS devices, 281

Workfunction
fabrication of a nanosize Si-tip coated with a thin diamond-like carbon film, 157

X-ray diffraction
X-ray diffraction and reflection from self-assembled Ge dots, 296
lattice distortion in dry-etched Si/SiGe quantum dot array studied by 2D reciprocal space mapping using synchrotron X-ray diffraction, 300
X-ray diffrcation
carbon and germanium distributions in $Si_{1-x-y}Ge_xC_y$ layers epitaxially grown on Si(001) by RTCVD, 129
X-ray photoelectron spectroscopy
new Ge substrate cleaning method for $Si_{1-x-y}Ge_xC_y$ MOMBE growth, 153
X-ray reflection
X-ray diffraction and reflection from self-assembled Ge dots, 296
